

Dr. Ramin Mirmooji.

Testimonial:

I discovered the West Island Emergency Clinic during a painful tooth episode where no one was available to take away my pain. I was not only grateful for the quick exam and diagnostic but became a regular patient. The service is super friendly, professional and accommodating. They even phone to schedule your next appointment and remind you of it. What I like the most is that Dr. Mirmooji has no problems answering all my questions, explaining them in words I understand. Recommended treatments (if needed) are always discussed in details with short/long term effects and offered with various options. He stays up-to-date by going to seminars and classes. He is funny and charming. What else can you ask from your dentist?
